

Given the following recipes, you and your friends need to figure out how much of each item is used, how much of each item you need to purchase, and how much is left over.

Step 1: Figure out how many items you need and how much of each item is needed for all three recipes.

Step 2: Determine how much you need to purchase being that you have to buy an item by how it is sold in the store, not by how much you need.

Step 3: Calculate how much of each item you have left after making the following items.

Recipe 1 (Chocolate-Oatmeal drop cookies)

2 ~~3/4~~ cups flour

2 ~~1/2~~ teaspoons baking powder

~~1/2~~ teaspoon salt

~~1/2~~ cup margarine

1 ~~3/4~~ cups sugar

1 ~~1/2~~ teaspoons vanilla

2 eggs

1 ~~1/4~~ cups milk

2 cups quick oatmeal

1 ounce cocoa

Recipe 2 (sugar cookies)

1 and $\frac{1}{3}$ cups flour

1 $\frac{1}{4}$ teaspoons baking powder

$\frac{1}{4}$ teaspoon salt

$\frac{1}{4}$ cup margarine

$\frac{3}{4}$ cup sugar

$\frac{3}{4}$ teaspoon vanilla

3 eggs

$\frac{2}{3}$ cup milk

Recipe 3 (Granny's Special Cake)

2 and $\frac{2}{3}$ cups flour

2 $\frac{1}{4}$ teaspoons baking powder

$\frac{1}{2}$ teaspoon salt

$\frac{3}{8}$ cup margarine

1 and $\frac{2}{3}$ cups of sugar

1 $\frac{1}{4}$ teaspoon vanilla

2 eggs

1 $\frac{1}{4}$ cups milk

Each container holds this amount:

Flour: 8 cups

Baking Powder: 20 teaspoons

Salt: 12 teaspoons

Sugar: 8 cups

Vanilla: 10 teaspoons

Eggs: 1 dozen

Milk: 4 cups

Margarine: 5 cups

Oatmeal: 8 cups

Cocoa: 8 ounces

Step 1: Determine what items are needed for baking the desserts.

Step 2: Add the fractions for each item

Step 3: Determine how much of each item you need to purchase from the store by looking back at how much each container holds.

Step 4: Subtract the amount you used of each item from the amount that you purchased.
